-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 6/13/06 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-60 and 62-71 are rejected under 35 U.S.C. 102(e) as being anticipated by Risafi et al, US Patent No. 6,473,500.

Risafi et al disclose a system and method for using a prepaid card comprising: step of closing a card account (when the account has remaining funds therein, closing it is to request a return/refund), closing the account requires withdrawing all the value remaining in the account and then disabling the account and the card's access to that account, the closing of an account can be performed at an ATM, through an agent terminal, through some other approved device, or through the issuer 102. For instance, the card user 10 presents card 100 to agent 104 and requests a closure of the account along with the refund of the rest of the funds in the account;

Art Unit: 2876

the card user 10 inputs the PIN to agent terminal 402, and the agent terminal 402 transmits the card number, PIN, and transaction code to prepaid debit card center (PDC) 404, the PDC 404 checks the Card File to verify that the PIN matches and that all other issuer- or PDC-specified criteria have been met and determines how much value remains in the account, the PDC 404 sets the card account balance to zero and decrements the Account File by the amount of the refund, and transmits an approval and the amount of the refund to agent terminal 402; once approval is received, the agent 104 gives the money to card user 10, minus any transaction fees. The structure of Risafi et al is capable of performing all the method steps as set forth in the claims. (see figs. 8a-b;col. 15, line 13+).

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Molano et al, US patent No. 6,032,135. Teicher, US Patent No. 6,119,946.
